**OVERVIEW**

REGISTRATION OF PARTICIPANTS  
WILL BE ON A FIRST-COME-FIRST SERVED BASIS.

This training is to provide an understanding of the MDA/RR No. 1, Good Distribution Practice for Medical Devices (GDPMD), addressing requirements in the medical device supply chain, which include, but are not limited to, product sourcing and procurement; transportation and delivery; storage; installation, commissioning, service and maintenance, calibration and after-sales service; tracking, documentation and record-keeping practices.

In order to carry out activities relating to medical devices, certification to GDPMD is required for establishments such as Authorised Representatives, Importers, and Distributors in applying for establishment license. This is to ensure the safety and performance of medical devices are preserved post-manufacturing until their disposal.

This training aims to help participants in understanding the scope and use of GDPMD in complying with the Medical Device Regulations and to assist participants intending to pursue GDPMD certification.
